Re: Visitation Revisions

As you have all probably heard, there has been some loosening up of visiting restrictions by DHHS, which is great news, however, strict infection control and social distancing guidelines must continue to be followed. With that said, I wanted to outline our short term visitation plans at Brookridge.

Beginning October 1st, visits can be scheduled Monday through Friday from 9a-4p and will be limited to 45 minutes. Two visitors will be allowed per resident. Two outside visits and one inside visit will be scheduled each hour and arrangements will be made for outside visits in the case of inclement weather. Visitors should come to the lobby and be screened and to have their temperature taken at the security desk. Please arrive and finish your visit timely as we need to allow time for disinfecting/cleaning of areas between visits.

We will also begin conducting some communal activities and dining at Brookridge starting October 1st, while continuing to adhere to strict infection control and social distancing requirements.

I know that this is not the ideal visitation arrangement, but it is a start and my hope is that if we can be successful at this trial run and continue to keep Covid-19 out of the community, we can open up to more liberal visitation sooner than later.

Thank you and I look forward to you all coming back to visit at Brookridge.

Please let me know if you have any questions.

Sincerely,

Ally Switzer
